### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION*****Priority***

- 1) Receipt is acknowledged of a certified copy of the Canadian application 2,412,425 referred to in the oath or declaration or in an application data sheet. If this copy is being filed to obtain the benefits of the foreign filing date under 35 U.S.C. 119(a)-(d), applicant should also file a claim for such priority as required by 35 U.S.C. 119(b). If the application being examined is an original application filed under 35 U.S.C. 111(a) (other than a design application) on or after November 29, 2000, the claim for priority must be presented during the pendency of the application, and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior foreign application. See 37 CFR 1.55(a)(1)(i). If the application being examined has entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the claim for priority must be made during the pendency of the application and within the time limit set forth in the PCT and Regulations of the PCT. See 37 CFR 1.55(a)(1)(ii). Any claim for priority under 35 U.S.C. 119(a)-(d) or (f) or 365(a) or (b) not presented within the time period set forth in 37 CFR 1.55(a)(1) is considered to have been waived. If a claim for foreign priority is presented after the time period set forth in 37 CFR 1.55(a)(1), the claim may be accepted if the claim properly identifies the prior foreign application and is accompanied by a grantable petition to accept an unintentionally delayed claim for priority. See 37 CFR 1.55(c).

Applicant should note that the Declaration filed 11/19/03 has marked the box Not claiming forming priority, however it is also noted that applicant has attempted to claim priority by

election under 37 C.F.R. 3.71 which does not appear valid in this case because it does meet the conditions for such a claim.

***Claim Rejections - 35 USC § 102***

- 2) The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- 3) Claims 1 – 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsunoda et al '438.

Tsunoda shows an endless track 10 comprising a body of elastomeric material with an outer surface and an inner surface having a series of longitudinally spaced guide blocks 2 comprising a front face, a rear face and opposite side faces 4, wherein the opposite faces are formed of pads 3 made of low friction resin material of UHMW integrally molded to the elastomeric material forming the guide blocks as claimed.

***Conclusion***

- 4) The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tsunoda et al '396, Nishimura et al '802, Muramatsu et al '489 and 365 and Singer et al '654 show elastomeric endless tracks having a series of longitudinally spaced guide blocks on the inner surface with opposite side faces formed of pads of UHMW low friction resin material integrally molded to the guide blocks as claimed.
